

Brookville Mining Equipment Corporation
Product Information Bulletin 55 (05-31-01)
Brookville Model High Profile Tunneling Locomotives
Operator's Compartment Safety Chain Addition Procedure

Purpose:

Some Brookville Mining Equipment tunneling style locomotives (high height and narrow profile) may have been shipped without operators compartment safety chains. This bulletin is to make aware the owner/operator of the locomotives that they should have operators compartment safety chains installed on their locomotives.

Action:

If your units do not have existing safety chains, Brookville will provide free of charge safety chain kits that contain parts and instructions on how to install the safety chains.

Verification:

Please fill out the locomotive identification page and fax back to the attention of Harry Reitz.
